2. INTRODUCTION

Barcotech Services Ltd is an electrical contractor, energy consultant and a solar PV contractor.

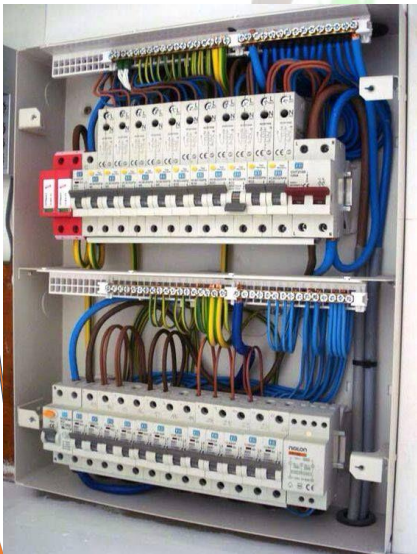

It is a company where professionals from both technical and functional field group come together with an objective of providing appropriate power solutions. The key to the company's success is the maintenance of a close working relationship with the clients through ensuring the best possible solutions to their needs; to establish and maintain a thorough knowledge and understanding of client's objective and help them maximize the benefits.

We want to establish ourselves as the best choice in electrical services, consultancy and development by offering the full spectrum of services.

3. AREAS OF EXPERTISE

Main Strength of Barcotech lies in the blend of professionals, specialized and highly focused operation. Increasing customer's awareness is the strength where it excels over its competitors. Our strength lies in our ability to blend current management practice and electrical expertise into cost-effective electrical power solutions, products, and services. Barcotech understands the need for skill transfer to client personnel. Our offers cover the following major areas:

Area	Details
Solar PV Installations 	Solar PV systems are a renewable energy source that convert sunlight into usable electricity. We offer solar solutions to residential, industries and commercial buildings. The Solutions includes; <i>Grid-tied solar PV systems, Hybrid systems and off grid systems</i>
Electrical installations 	Installations include, <i>switch boards, changeover systems, main and sub main distribution boards, generator installations, machinery & Equipment termination.</i> BSL will plan and design, select and install, commission, test, report, maintain, fault find and repair systems to a high standard. Work organization and self-management, communication and interpersonal skills, problem solving, flexibility and a deep body of knowledge are the universal attributes of our electricians.
Solar Water Heating 	Solar water heating (SWH) is heating water by sunlight, using a solar thermal collector. It is categories into: <i>We offer solar water heating solutions to residential, industrial and commercial areas.</i>

Electrical maintenance

Electrical maintenance means the care and checklist of electrical equipment or instruments to minimize or eradicate breakdowns or faults. To tighten all electrical connections, integrity tests, to upgrade the power rating of safety-switches is also a part of electrical maintenance. Electrical maintenance services offered at all levels, industrial, commercial and residential.

Power factor correction (PFC)

PFC is applied to the circuits that include induction motors as a means of reducing the inductive component of the current and thereby reduce the losses in the supply. PFC has no effect on the operation of the motor itself.

After the required hardware is installed, you will notice an immediate improvement in power factor, **a more efficient use of your available electrical power and of course monthly savings in your electricity bills.**

CCTV Installations

BSL install Closed-circuit television for residential, commercial and industrial facilities.

Other services include:

- Electrical Inspection
- Industrial Automation
- Thermal Imaging.
- Earthing and Earth testing.

4. MISSION AND VISION STATEMENT

Vision

Energizing Ideas

Mission

To build a long-term relationship with customers and to provide them with services that is of both high quality and standard.

We believe in;

- Motivation
- Collective responsibility and leadership
- Professionalism and ethics
- Adding values to our client needs

5. HEALTH, SAFETY AND ENVIRONMENTAL POLICY

OCCUPATIONAL HEALTH AND SAFETY POLICY

Barcotech Services Ltd (BSL) recognizes and appreciates the importance of occupational health and safety policy in the organization.

BSL is committed to protecting the health and safety of all persons in a certain site including employees, contractors, customers and visitors. BSL demonstrates this commitment through its safety management system that is integrated with all organizational activities related to services and people.

BSL will take all reasonable and practical steps to improve work safety conditions. Priority will be given to accident prevention, hazard control, and preservation of health.

Occupational health and safety is both an individual and shared responsibility of all: employees, contractors, visitors and customers.

In order to minimize accidents and cases of ill health, the company is committed to:-

1. Developing and maintaining effective occupational health, safety and welfare arrangements to protect its staff and all who come into contact with its operations.
2. Continuous improvement of occupational health and safety performance following industry best practice.
3. Compliance with all relevant legal and statutory instruments in all matters of occupational health and safety.
4. Providing an effective occupational health and safety management system (HSMS) to help manage health and safety risks.
5. Providing adequate resources to analyze and review accident trends to prevent recurrence.
6. Ensure contravention of the Occupational Health and Safety Management system attracts severe disciplinary action including dismissal and/or prosecution.
